

Health & Safety Arrangements

Every effort is made to ensure a safe environment for the school's pupils. The play area has a secure boundary and the building is safeguarded by a combination of digital and non-digital locks. The site is inspected by the Governors and officers of the County Council to ensure a continuous maintenance programme and the fire alarm, extinguishers and electrical equipment are inspected annually.

Our aim is to create a safe working environment for all to work in, ensuring adequate supervision according to current needs and we instil in the children the need to be safety conscious.
